

Nilza da Silva

Nilza joined MFG in 2018 as a member of the Oil and Gas team. She was immediately assigned to major oil and gas projects and still works for that, mostly involved in Emergency Response Plans during commissioning an operation phase. In parallel she undertook other Oil and Gas assignment in regards to HAZOPs, QRA and ATEXs studies in various projects.

Nilza started her professional career in Petroleum engineering working for Chevron overseas at Offshore Angola. She has graduated in Chemical Engineering from the University of Chemical Technology and Metallurgy (UCTM), in Sofia, Bulgaria, majoring in the Technology of organic synthesis and fuels.

She is an MBA holder from Leicester University. Also, holder of an MSc in Oil and Gas Technology from the International Hellenic University (Master's thesis in the implementation of the Offshore Safety Directive in Southeast Europe).

She is NEBOSH HSE Certified in Process Safety Management and Risktec - TÜV Rheinland certified in Risk & Safety Management.
