

Felix Müller is Vice President of Trading Regulatory Affairs at SEFE Securing Energy for Europe GmbH. With a Diploma (FH) in Mathematics and a career spanning roles in regulatory affairs and business development, he brings deep expertise in European energy markets. Felix plays a leading role in shaping regulatory frameworks through chair and vice-chair positions in associations such as Eurogas, Energy Traders Europe, and BDEW. His focus areas include Energy Trading, Grid Access Rules, Emission Trading Systems, and Security of Supply. A strong advocate for market-based solutions, he emphasizes the need for transparency, standardization, and clear regulatory guidance to ensure efficient and resilient energy systems. Born in Leipzig, in the former GDR, Felix has experienced firsthand the transformative power of systemic change—insights that continue to inform his approach to navigating and shaping Europe’s evolving energy landscape.
