

Mr. András Jenei

**Deputy Director – [E2050 Interdisciplinary Research Center](#);
Chief Relations Officer – [Maxwell Quant](#)**

András Jenei is currently Deputy Director at E2050 I.R.C., which is an interdisciplinary non-profit research center dedicated to provide scientific support for firms of the energy industry. Also Chief Relations Officer in Maxwell Quant a Vienna based interdisciplinary research and development company in the energy sector. Further he is Deputy Director at Centre for Fair Political Analysis, a political and energy think-tank based in Budapest. He was formerly an Energy Policy Advisor to the Ministry of National Development, Energy State Secretary, Hungary, as well as to the Committee on Sustainable Development of the Hungarian Parliament. He studied engineering management at Technical University of Budapest (BME) and holds a BSc from Political Sciences at King Sigismund College. His research fields are energy policy, national energy strategy, unconventional hydrocarbons development and energy security focusing on natural gas in Europe, FSU and the Caspian region. In the past five years his main focus was on unconventional hydrocarbons upstream in the CEE region dealing with the national upstream regulatory framework, environmental issues, and gas market and competition.
