

Volkan Yiğit, Managing Partner, APLUS Enerji

Volkan Yiğit is the Managing Partner of APLUS Enerji Consulting and Technology firm based in Istanbul and leads the consulting services of the company. Volkan provides market price forecasting, regulation advisory and investment consulting services to clients in the Turkish energy market. Volkan has more than 12 years of experience in the energy sector, advising energy companies, investment funds, local & international financial institutions, local authorities (including Ministry of Energy and Natural Resources and the regulator EMRA), think-thanks, international climate organizations and industry associations. Volkan and his team in APLUS Enerji drafted the first "coal-exit strategy for Turkey" and presented their findings during the COP26 meeting in Glasgow in 2021.

Before joining APLUS Enerji in 2015, Volkan worked for German utility company RWE's strategy and market intelligence team in Turkey and prior to that, he worked in construction project management roles between 2008 and 2012. Volkan holds an MSc degree in Energy Science and Technology from Istanbul Technical University and he has been a certified PMP since 2013.
