

**Artúr Zoltán Böröcz**, Director, Advisory, KPMG

Artur started his career at E.ON in 2008, where he was initially responsible for underground gas storage tariffs and regulatory aspects. He then moved to E.ON's group level innovation team, where he focused on foreseeable changes and system-level innovation. He played a pivotal role in developing an independent view on key power generation technologies, including modeling future costs for large and small scale power generation and hydrogen technologies. After several years in various nuclear and power infrastructure roles, he has been one of the key senior energy specialists at KPMG Hungary since 2020. Artur has in-depth expertise in energy and utilities, including business and technology strategy development.
